Re: City of West Branch College – Bridge Replacement-CSS

Summary for Website

Last week, the Contractor set the bridge deck support beams on the west piers. Water services were connected along College Street and Second Street. The new water main was tested and is now in use. The old water main will be abandoned in place, once all services have been identified as being connected to the new main.

This week, the Contractor is cleaning out the east ditch and preparing to set the steel and forms to pour the east piers later in the week. The conflicting sanitary sewer services along Second Street are being lowered in order to install the storm sewer along College Street and Second Street.
